

## Hannu Parviainen

*Planetary Systems and Solar System*

**Advanced Fellow Severo Ochoa**  
15/02/2021 - 31/12/2024

I obtained my PhD at the University of La Laguna in 2014. My first postdoc was in the University of Oxford (UK) where I was funded by the Oxford University's exoplanet research group and robotics research group. I returned to the IAC as a generic postdoc at the end of 2016, and I finally become an Advanced Severo Ochoa Fellow in 2021. My research interests are mainly focused on extrasolar planets, Bayesian statistics, and the use of modern numerical methods in astronomy.
