

Alberto Escobar Rodríguez

Severo Ochoa Manager
15/04/2021 - 31/12/2024

Alberto is a Physicist (Kharkov State University, Ukraine, 1985), and Ph.D. (University of the Basque Country, Spain, 2007). Highly qualified in science, technology and innovation management and policies, he has worked as researcher, manager, and executive. Alberto has proven experience in the elaboration, execution and management of research and innovation projects, and in their evaluation. He has wide experience managing European projects, as well as national and regional ones. Alberto joined IAC in 2013, and managed SOLARNET-FP7 and GREY-H2020 European projects. In October 2018 Alberto joined the European Solar Telescope project office, where he was in charge of managing the direct grant awarded to EST by the Canary Government on ground of public interest, and also SOLARNET-H2020, MICAL and INSIDE projects. Recently, Alberto has been awarded the manager position of the Severo Ochoa project.
